Business Summary Report

EXECUTIVE SUMMARY

This report provides a professional-level view of sales performance, focusing on profit margin, region, product category, regions, segment, and discount impact. It is designed to support data-driven decisions and is directly adapted to a Power BI sales dashboard.

KEY PERFORMANCE INDICATORS

Metric	Value	Units
Total Sales	**₹ 701200**	Overall revenue generated
Total Profit	**₹ 135390**	Overall profit generated
Total Orders	**50**	Number of unique orders
Profit Margin	**19.31%**	Percentage of Margin
Popular Region	**North (27.83%)**	Highest Sales Region
Profit Margin by Product	**Technology (21.37%)**	Profitable Product

Sales Performance Analysis

• **Sales Performance:** Calculate total sales performance of all regions.

• **Highest Revenue Region:** Identify highest revenue across regions by finding segment and product category .

•**Highest Profit Margin:** Identify total profit margin, estimate its profit margin % across category.

•**Average Order Value:** Calculate average order value of products.

• **Customer Contribution:** Identify the top 10 customers by sales and profit to strengthen retention and account-management strategies.

Profitability & Discount Analysis

Monitor month wise discount and analyse its effects on product profit. A discount may increase sales volume while reducing the profit earned per order. Here a diagram is showed where discount band and Business decision has discussed.

Discount Band	Discount Range	Business Interpretation
No Discount	**0%**	**Standard pricing; protects profit margin**
Low Discount	**1%–10%**	**Healthy discount; supports sales; increase profit margin**
High Discount	**11%–20%**	**Aggressive discount; may reduce profitability**

Key Recommendations

1. **Focus on profitable growth**: Prioritize regions and products that generate both strong sales and strong profit.

2. **Control discounting**: Review high-discount transactions and establish discount thresholds based on margin.

3. **Monitor sales trends**: Use monthly performance tracking to identify changes across regions and product Performance.

4.**Region Wise Product Demand:** Monitor region wise product demand, profit margin, discount band respectively.
